UDHSC OPPORTUNITIES

- NCPDP SCRIPT Standard Version 2017071
 - CMS adopted 4/2018; Previous version 10.6 was sun-setted 9/1/2021
 - If an organization does not complete their migration...end users may need to revert to paper or faxing prescriptions which may prohibit them from being able to prescribe controlled substances given certain laws require e-prescribing of controlled substances. ([link](#))
 - Adds standards for e-prescribing and medication histories for ambulatory/reconciliation
 - Cancel-Rx: if provider wants to correct a mistake on a prescription or discontinue therapy of an active prescription with refills
 - RxChange: used by the pharmacist to request a change to a prescription when such change is permitted by state and/or federal laws/regulations (e.g. allergies, overutilization, can't break package into smaller quantities.)
- Cybersecurity for smaller health businesses
